Chapter 3: [Functional Performance Criteria](#) (FPC)

Notes:

Criteria	Conformance Level	Remarks and Explanations
302.1 Without Vision	Partially supports	Our software does not fully support the speech component of ZoomText and Jaws with respect to focus. Also screen readers can correctly present all labels of menus and context menus.
302.2 With Limited Vision	Supports	Our software supports the use of screen readers to access user interface information and has internal print enlarging technologies as well. Users of Windows operating systems can change the DPI settings or access Screen Magnifier in the Accessibility Options or via the Ease of Access control panel section.
302.3 Without Perception of Color	Supports	Our software does not require color perception for access to any application functionality.
302.4 Without Hearing	Supports	Our software does not require user hearing for access to any application functionality.
302.5 With Limited Hearing	Supports	Our software does not require user hearing for access to any application functionality.
302.6 Without Speech	Supports	Our software does not require speech for access to any application functionality.
302.7 With Limited Manipulation	Partially supports	Due to the visual nature of diagrams, some operations in our software may require discrete motor skills such as using the mouse to create a shape or to connect lines. However, our software supports operating system tools such as StickyKeys and FilterKeys, as well as screen magnification.
302.8 With Limited Reach and Strength	Supports	Our software does not require reach or strength for access to any application functionality.
302.9 With Limited Language, Cognitive, and Learning Abilities	Partially supports	Our software is a UML modeling tool and requires sufficient cognitive abilities to understand the natural complexity inherent in object-oriented programming languages.
